Arch Package Managers

How to Install an AUR helper

package-query

```
git clone https://aur.archlinux.org/package-query.git
cd package-query/
makepkg -si
cd ..
rm -rf package-query/
```

yay

```
git clone https://aur.archlinux.org/yay.git
cd yay
makepkg -si
rm -rf yay/
```

Delete cached files

pacman

Deletes cached versions of installed and uninstalled packages, except for the most recent 2:

```
paccache -r -k2
```

Remove package cache and currently unused sync databases:

```
pacman -Sc
```

yay

Remove cached AUR package and any untracked Files in the cache (caution: this command removes pacman caches as well):

```
yay -Sc
```
